

ANNUAL PRM FEE INFORMATION DOCUMENT

ANNUAL MEETING OCTOBER 2024

Introduction

EU Regulation No. 1107/2006 of the European Parliament and of the Council of 5 July 2006 was introduced to ensure that persons with disabilities and reduced mobility ("PRMs") have the right to mobility, in compliance with the principle of free circulation, free choice and non-discrimination.

With application circular ENAC [Italian Civil Aviation Authority] GEN 02 revision A of 19 December 2014, the Entity - identified with Ministerial Decree 107/T as the Body responsible for the proper application of the above-mentioned regulation (EC) 1107/2006 in national airports - provided air transportation operators with guidelines for the application of the above-mentioned EU regulation and, in particular, in Art. 11 governed the responsibility of operators with respect to assistance.

ENAC - as the Body responsible for the application of the EU Regulation pursuant to Article 14, paragraph 2 of the Regulation - is the Entity responsible for the definition and periodic monitoring of PRM fees applied at national airports.

Directive 2009/12/EC, establishing the Transport Regulation Authority (ART), expressly provided that *"The directive does not apply to the fees collected for the remuneration of the en route and terminal air navigation services pursuant to regulation (EC) no. 1794/2006, or to the fees collected as compensation for the on-ground assistance services pursuant to the annex to directive 96/67/EC, or to the fees collected to finance the assistance provided to persons with disabilities and persons with reduced mobility pursuant to regulation (EC) no. 1107/2006"*.

The company, after the years of extension in the face of the pandemic crisis, resumed submitting the revision prospectus for PRM tariffs from 2023.

The 2024 tariffs based on the 2022 regulatory accounting were delayed as ART-imposed changes to the structure of Co.Re. models necessitated recertification of the same completed in January 2024. The approval process that began with the submission to the utility was completed with entry into force in September 2024. The 2026 tariffs will report the adjustments between what was collected in 2024 and the related costs.

Today, we are presenting the 2025 tariff proposal taking into account the 2023 cost accounting findings of what was collected and spent in previous years and the expected inflation rates as stipulated in the PRM fee calculation guidelines.

Tariff proposal

Having overcome the years of the pandemic period, traffic levels have returned to not only what was expected but even growing compared to forecasts.

Since April 2023, SAC has been working on the definition of the 2024-2027 investment plan and other activities preparatory to the signing of the Program Contract, and the related Fare Review Consultation slowed only by the difficulties in implementing the new fare models that came into effect in March 2023.

However, the slowdown in the approval of other regulated tariffs does not affect those of the PRM, which follow an independent approval process.

As is well known, the PRM tariff calculation models postpone the final reporting of actual costs and revenues by one year.

The 2025 tariff takes this into account and shows the 2023 workforce and costs increased by the rate of inflation, related to the projected number of passengers.

Documentation / information subject to consultation

This document provides users with the information provided for by the Guidelines for the calculation of the PRM Fees in par. 6.2.1.1:

- a) Analytical statement of the PRM billing centre, 2023 actual data
- b) Final tariff proposal for the PRM fee to be applied in 2025, indicating any tariff adjustment
- c) Criteria used to identify the drivers for the allocation of indirect costs and the methodology (allocation key) used for the chargeback of general costs
- d) The level of eligible NIC for the year subject to actual reporting, applicable to the PRM billing centre, net of the credit - debit balance
- e) Forecasts, for the reference year, of service units (departing passengers, net of legal exemptions)
- f) A disclosure on the service level offered and on the quality standards the Operator must pursue for all phases of the service, pursuant to Annex 1 of circular ENAC GEN 02 A, as well as, in particular, the quality indicators/objectives concerning the PRM service included in the Quality Plan approved by ENAC
- g) An indication of the methods for carrying out the PRM service (carried out directly by the Operator or assigned to third parties)
- h) A disclosure on the workforce component and the number of workers (FTE) annually dedicated to the PRM service and the relative cost

f) Disclosure on the service quality level

As regards the service level offered and on the quality standards, the Operator must pursue for all phases of the service, pursuant to Annex 1 of circular ENAC GEN 02 A, as well as, in particular, the quality indicators/objectives concerning the PRM service included in the Quality Plan approved by ENAC, please take note of the following table.

Table 2
Quality objectives relating to waiting time for the execution of the service

Departures NB	11'	9'48"	ND	16'05"	15'30"	15'	14'30"	11'30"	11'
Arrivals B	8'30"	7'	ND	6'42"	6'	05'25"	05'20"	05'00"	04'30"
Arrivals NB	12'30"	11'44"	ND	9'45"	9'	06'59"	06'49"	06'30"	06'00"

Also with regard to the indicators relating to PRM boarding / landing performance with / without pre-notification, the analysis of the 2021 data, reported for documentary completeness, is of little significance and affected by factors such as the long interruption of the surveys during the lockdown, the organization conditioned by the decrease in traffic and the use of the CIGS, the reduced and inconstant passenger traffic, the performance of additional control activities related to the pandemic.

Table 3
Quality objectives relating to PRMs included in the Quality and Environment Plan 2024-2027

g) h) Methods for carrying out the service and workers

The PRM service at the Catania Fontanarossa airport is carried out through the use of resources that refer to the subsidiary SAC Service.

h) Workers dedicated to the PRM service and their cost

Table 5
Cost of Personnel and staff dedicated to the service

	2022		2023		2025	
	Costo	FTE	Costo	FTE	Costo	FTE
Total PRM personnel costs	4.664.648	101	6.070.396	128	6.321.795	128
PRM Operators	4.112.282	101	5.369.658	128	5.592.037	128
Indirect attribution	552.366	% da driv.	700.738	% da driv.	729.758	% da driv.
Third party services	0	0	0	0	0	0,0
SAC Service Operators	0	0	0	0	0	0

From 2022 with the entry into force of the new regulatory accounting schemes, the analytical financial statements are presented in consolidated form so that the service operators provided by the subsidiary SAC Service previously included in third-party services are now included in labor costs.

The number of staff has increased to cope with both the growth in the number of attendances, set to grow further over time, and to ensure much lower service levels and waiting times than in the past, times that would otherwise have risked slowing aircraft turnaround.

Considering that the number of assistances has reached and exceeded those in 2019, one can compare the service levels between 2019 and 2023 achieved even through the allocation of more resources to the service itself.

i) Infrastructure dedicated to the PRM service

To provide the Passengers with Reduced Mobility assistance service, the Company has:

- an activity control and coordination room with:
 - o a server dedicated to gathering information and calls complete with a sw platform and dedicated tablets
 - o 5 operator workstations
- 5 call totems used by PRMs to contact assistance services
- 180 wheelchairs for passenger transport
- 8 lifts to load disabled individuals into the aircraft
- 2 shuttles to transport disabled passengers to the aircraft
- 1 'Sala Amica' reception room for welcoming PRMs in the Land Side area
- 1 PRM pre-boarding room in the Gates area
- 2 elevators dedicated to the PRM service for the transfer of passengers from the Terminal to the loading points on the lifting means
